History

- History of Dr.Fischer Pharmaceuticals:

Since the end of the last century (1891) until the present time, three generations of Dr. Fischer have been associated with medicine and research in the fields of biochemistry, microbiology, photobiology and pharmacology.

Dr. Fischer Pharmaceuticals was founded by Dvora and Dr. Eli Fischer in 1965.

Company founder and present chairman Dr. Eli Fischer, working with a committed team of scientists, has been responsible over the years for originating many innovative pharmaceutical and state-of-the-art products based on his imaginative concepts. These products are now an accepted part of the commodities landscape throughout the world and as such enjoy universal appeal and demand.

Today, Dr. Fischer is a multi-national concern, manufacturing and distributing a large variety of high technological pharmaceuticals worldwide with special emphasis on various categories of dermatological products, wet wipes and nutraceuticals.

The Fischer Pharmaceutical Group of manufacturing and marketing concerns now comprises of 19 individual companies.

Fischer Pharmaceutical's progress over the years has been due to its own in-house product development, cooperation with outside research institutions, as well as the acquisition of other like-minded companies.

About

- **Mission Statement:**

Dr. Fischer Pharmaceuticals intends to remain in the forefront of R&D and the manufacture of innovative health care products with special emphasis to anti-aging skincare and nutraceuticals (functional foods); products that offer the consumer the very best approach of both worlds; science and nature.

Fischer Pharmaceuticals will continue to strengthen the company's technological know-how and deepen the expertise and experience that it has acquired over a period of four decades in order to provide a wide variety of high quality products for overall family health care from the very young to the most senior.

Fischer Pharmaceuticals will continue to produce ecologically friendly products that empower and determine the environmental message of the day. The company will endeavor to pinpoint the activity (the why and how) of natural ingredients, improve product performance and shelf life and increase purity and health enhancing attributes of its products.

Fischer Pharmaceuticals is convinced that its involvement and activities with the global community are more than just a moral commitment but rather an integral part of the company's successful relations with its clientele and the consumer society as a whole.
